# LaundryX Cost Management Program

Energy is one of the largest costs in your laundry operations.  
 More than 60% of hotel linen is room linen (towel & sheet).  
 More than 50% of total laundry costs is spent on energy & water.  
 Saving energy and water at room linen washing will provide huge costs saving impact.

## Washing room linen in low temperature can add up to huge savings in many ways

One of the biggest costs factors in the laundry is energy costs. Now you can wash in 50-60°C and reduce steam & electricity consumption.

Laundry-X detergent system is designed for low temperature washing and save more water.

By reducing time at each wash, you increase the productivity and prolongs the life of your machine. more productivity, more business, more bottom line.

Laundry-X low temperature program makes for longer lasting linen. Save linen replacement costs.

Laundry-X saves you time in heating water to high temperatures.

Saving energy and water, as well as lower alkalinity in your water enables you to contribute to saving our world. Something your company can be proud of!

## Knowledge +
